This theme has been made with the great and endless scenic beauty that is often seen in the nature in mind and so you will surely enjoy its simple yet wonderful view. Golden Water Windows 7 Theme The Golden Water Windows 7 theme is a beautiful theme dedicated to the awesome art of nature when it often paints the water bodies on earth with golden colors especially during sunrise and sunsets. The golden color created naturally on water surfaces through reflection is one of the most beautiful and enchanting sights of nature and this Windows 7 Theme is dedicated to the same. The golden color lasts only for a few minutes during suitable weather conditions before it turns orange and red and disappears into darkness and so capturing the same is a bit difficult.

Golden Water Windows 7 Theme Description: Golden Water is a theme that welcomes you to an inspiring and breathtaking scenery and you can use it to showcase your photos and images of lakes, oceans and more natural beautiful areas of your Windows 7 computer. This theme has been made with the great and endless scenic beauty that is often seen in the nature in mind and so you will surely enjoy its simple yet wonderful view. The present invention relates to an improved field emission tip, and more particularly to an anisotropic field emission tip, which can be used to limit the current and voltage limitations, and to improve its abrasion resistance. Field emission tips are generally referred to as cold cathode electron sources and can be referred to as electron emitters. An electron emitter is an electron source that emits electrons when a large electric field is applied to the surface of the emitter. This phenomenon was first described by a Russian scientist W. P. T. Hilsdorf in 1921. Fields of 100 V/nm is necessary for a cold cathode to begin emitting electrons, and can be as high as 30,000 V/nm for certain materials. The cold cathode devices are described by the following devices: Spindt tips, Conical tips, micro tips, Cold Field Emission, and Thin-wire tips, etc. The same kind of phenomenon that is seen in cold cathodes has also been observed with hot cathodes. Hot cathodes can be referred to as electron sources that emit electrons when heated. Most hot cathodes use thermal electron emission, plasma electron emission, and field
